The graph illustrates the relationship between the rate and the additional fee. The vertical axis is labeled 'RATE (\$)' and the horizontal axis is labeled 'ADDITIONAL FEE (\$)'. There are two intersecting lines: one with a positive slope and one with a negative slope. The intersection point is marked with 'X'. The positive slope line is labeled with '=' at both ends, and the negative slope line is also labeled with '=' at both ends. The graph shows that as the rate increases, the additional fee initially increases (positive slope) and then decreases (negative slope), forming a U-shape.
